

control

ValueBox Control. Intelligent storage.

New ValueBox Control enables staff and organisations with high volumes of passengers and services to simplify administration and improve security for sensitive or expensive equipment and personal belongings. Although just as compact, its updated design now makes it possible to store bags, laptops, projectors, cameras and other large items with the same high level of security as the company's keys.

When someone needs to borrow equipment for a meeting or conference, the administrator does not need to be there to sign it out. The ValueBox system can be managed from anywhere and any computer or tablet using the KeyWin6 administration tool. Highest possible security and unparalleled versatility.

KEYWIN6

The KeyWin6 web app keeps track of every key or storage compartment. The Keywin6 web app gives you total control of your system down to user and key level. Log in to your browser wherever you are and manage your system from a PC, tablet or smartphone to reserve keys. The remote management feature saves valuable time for your business and for staff who need access to a key or storage compartment.
